NDIS BASICS

WHAT IS THE NDIS?

The National Disability Insurance Scheme offers financial assistance to qualified disabled individuals so that they can spend more time with their loved ones, be more independent, have access to opportunities in their community and learn new skills.

A disability affects around 4.4 million Australians. That's 1 in 6 in our communities living with a disability, and they need support for their everyday activities.

The NDIS connects individuals with disabilities to service providers in their local area. This includes putting them in touch with doctors, local organisations, sports teams, support groups, libraries, and schools, as well as providing information on the types of assistance that are offered by the governments of each state and territory.

From care to travel, education, home care, accommodation, and everything you can think of, by becoming an NDIS registered provider, you can make a difference in the lives of others.
